SERA INTERVIEW REPORT
30 Sep 2026
3-round interview · about 13 minutes

Sera Interview Report

for Priya

Practice offer: Tidewell Retail Technologies · Business Analyst

Getting there

SUMMARY

You gave concrete answers about real internship work and handled the bad-data deadline sensibly. Your answers were clear on the skill questions but got general when asked why you want this role. The main gap is showing your results with numbers.

You spoke for 6 min 20 s · 10 questions answered · 3 of 3 rounds completed
How Sera scores: each answer is rated 1–5 per skill against a written rubric for an entry-level candidate; the scores are then computed in code. Below 50 Needs work, 50–69 Getting there, 70+ Ready. Expected levels are YZI's own targets.

ROUND BY ROUND

How each round went

Screening
61/100 · 4:40

Specific about the dashboard work, with a clear example of fixing mismatched data.

HR round
54/100 · 2:30

Strong at explaining numbers simply; the motivation answer stayed general.

Final round
63/100 · 2:30

A sensible, two-option plan for wrong data before a deadline.

SKILLS, WITH WHAT YOU SAID

Where you stand on each skill

The dark mark on each bar is the expected level for this role (YZI's own target).

Communication
60/100

"I made a one page summary with three numbers and I explained it in the Monday call in simple words"
HR round · 0:16

This report was generated by Sera, an AI interviewer, from this one conversation. It can contain mistakes and is meant for practice only. Please review it before relying on it for any decision. Company names and offers are practice examples, not real job offers.

Role knowledge **56/100**

"I cleaned the monthly sales data in Excel, removed duplicates and fixed the dates"
Screening · 0:50

Problem solving **69/100**

"I made a mapping table with my manager and after that the numbers matched"
Screening · 1:54

Composure **56/100**

"I would tell my manager early"
HR round · 1:20

Judgement **63/100**

"tell the manager on the same day with two options"
Final round · 0:14

WHAT WORKED

Strengths you showed

- You explained a real data problem — mismatched product codes — and exactly how you fixed it.
  Screening · 1:54
- You turned a technical dashboard into a one-page summary for non-technical managers.
  HR round · 0:16
- With wrong data before a deadline, you offered two concrete options instead of only raising the problem.
  Final round · 0:14

WHAT TO WORK ON

Where to grow next

- Your answer on why you want this role stayed general. Name one specific thing about the company's work.
  HR round · 2:02
- Fillers like "basically" and "matlab" showed up while you were thinking. A short pause works better.
  Screening · 2:54
- Add a number to your results: how much time did the dashboard save each week?
  Screening · 0:50

ONE ANSWER, IMPROVED

Same facts, told better

“Why do you want this role at Tidewell?”

Sera's question · HR round · 2:02

YOU SAID

“I like working with people and data together, and this role has both.”

A STRONGER ANSWER

In my internship the part I enjoyed most was turning the sales dashboard into a one-page summary the store managers actually used. This role is that every day — working with the numbers and then with the people who act on them.

OFFER FIT

Fit for the Tidewell Retail Technologies offer

- **Stakeholder updates — shown in the interview**
  “I explained it in the Monday call in simple words” · HR round · 0:16
- **Excel — shown in the interview**
  “I cleaned the monthly sales data in Excel” · Screening · 0:50
- **Process mapping — not shown yet**

HOW YOU SPOKE

Measured from the interview

38 s	1.1/min	70%
Average answer length	Filler words (7 in total)	Share of the time you spoke

YOUR PLAN

What to do next

NEXT 30 DAYS

Put numbers on your work

For the dashboard and the mapping fix, write one line each with a before/after number you can say out loud.

Skills: Impact metrics, Excel

1–3 MONTHS

Learn process mapping basics

Map one real process end to end — who does what, where time is lost — and practise explaining it in two minutes.

Skills: Process mapping, Stakeholder updates

This report was generated by Sera, an AI interviewer, from this one conversation. It can contain mistakes and is meant for practice only. Please review it before relying on it for any decision. Company names and offers are practice examples, not real job offers.

6–12 MONTHS

Own a weekly report end to end

Take one report from data source to the decision it supports, and track what changed because of it.

Skills: SQL, Business communication
